Workshop on Implementing the FAIR Data Action Plan:

Specifying priority actions and responsibilities in different contexts

AGENDA

European Commission Expert Group on FAIR Data

European Open Science Cloud Summit 2018, Brussels, 11 June 2018

Agenda : FAIR Data Action Plan Workshop

This workshop will take the [FAIR Data Action Plan](#) defined by the European Commission's Expert Group and articulate what it means to implement it in different contexts. Groups will be formed around disciplinary areas and member states to discuss the priorities and next steps in each context.

Time	Activity	Speakers / Facilitators
14:30-15:00	**The FAIR Data Action Plan** A presentation of the key topics in the Action Plan (policy; research culture; technology; skills; metrics; costs), noting the key concepts, recommendations and actions put forward.	Simon Hodson
15:00-16:00	**Context-specific FAIR implementations** Participants will be formed into groups in advance of the workshop based on areas of expertise and interest. Handouts of the Action Plan will be provided to guide discussion. ● Agree one or two priority steps or topics from the Action Plan (e.g. Step 2 or 'Skills') so you have a small cluster of recommendations to discuss. ● Reflect on the existing recommendations and actions: Are they relevant for your context? Is anything missing? Which are most important? Which should be prioritised? ● Expand on the Actions for your chosen topics by determining next steps to implement in your context. Build on existing initiatives and try to define the actors and timeframes.	FAIR EG members
16:00-16:30	**Coffee**	
16:30-17:10	**Report back** Each group will be asked to give a very brief (3 min) report (presented in quick 'bullet points' not narrative): ● Give a brief reflection on the relevance of the cluster of recommendations and actions your group discussed - were they appropriate or were any key points missing? ● Explain how you tailored the points in the action plan to your context,stating specific actions and stakeholders assigned activities Notes from the group will be shared electronically and rapporteurs will be invited to flesh these out for input to the review process.	
17:10-17:30	**Wrap up and next steps** A summary of how to develop the context-specific FAIR implementations further and plans for the consultation on the FAIR Data Expert Group interim report and Action Plan.	Sarah Jones
17:30	**Close**
