CERN's White Rabbit

Case study of the Open Science Monitor

5th December 2018

theLisboncouncil

Agenda

1. Introduction (David Osimo, The Lisbon Council)
2. White Rabbit presentation (Javier Serrano, CERN)
3. Discussion (Laia Pujol Priego, ESADE)
4. Q&A
5. Wrap-up

Agenda

1. **Introduction (David Osimo, The Lisbon Council)**
2. White Rabbit presentation (Javier Serrano, CERN)
3. Discussion (Laia Pujol Priego, ESADE)
4. Q&A
5. Wrap-up

Objectives of Open Science Monitor

To determine the **scope, nature** and the **impacts** of Open Science in Europe and globally across the Research Cycle in order to **provide an evidence-based view of evolution of Open Science.**

In particular:

- To deliver a **monitoring system for trends** in Open Science;
- To **analyze drivers, barriers and impacts through 30 case studies**
- To provide **structured analysis of policy-relevant trends** in Open Science.

OSM is a monitoring tool providing aggregate indicators, not a research assessment tool.
