

Katrin Jõgi

your go to person in sustainable biotechnology, food technology and bio-waste valorisation!

Background:

- BSc and MSc in food technology, PhD about food waste valorisation in process
- Work experience in food and packaging industry (from private and public sector)
- Expertise in food contact materials

My work in Fibenol as a sustainability manager:

Fibenol valorises forestry and wood industry residues (secondary woody biomass) into sustainable chemicals.

My main tasks include:

- Life Cycle Assessments (LCA)
- Regulatory compliance

Professional and personal interests:

I am passionate about nature, food, biotechnology, and bioeconomy.
