

To Members of the Scholarly Publishing Community:

As national leaders on science policy, we extend our sincere gratitude to the scholarly publishing community for quickly answering our call to voluntarily make all COVID-19-related publications and data immediately accessible, in a public repository and in machine-readable format, to allow full text and data mining with rights for reuse. This move reinforces the global, all hands-on-deck effort that is required to address the present health crisis.

The following groups, among others, have answered the call to make COVID-19 research and data publicly available to date:

- American Chemical Society
- American Medical Informatics Association
- American Physical Society
- American Society for Microbiology
- Annals of Internal Medicine
- The British Medical Journal (BMJ)
- Bulletin of the World Health Organization
- Cambridge University Press (CUP)
- Cell Press
- Chinese Journal of Lung Cancer
- eLife
- Elsevier
- EMBO Press
- Emerald Publishing
- European Respiratory Society
- F1000 Research Limited
- Frontiers
- Future Science Group
- Healthcare Infection Society
- IOP Publishing
- JMIR Publications
- Karger Publishers
- The Lancet
- Life Science Alliance
- Microbiology Society
- New England Journal of Medicine (NEJM)
- Oxford University Press
- PLOS
- Proceedings of the National Academy of Sciences of the USA (PNAS)
- Rockefeller University Press (RUP)
- The Royal Society
- SAGE Publishing
- Science Journals
- Springer Nature
- Taylor & Francis

- Wiley Research
- Wolters Kluwer

Sent on behalf of the chief science advisor or equivalent representing the following countries:

Australia	Japan
Brazil	New Zealand
Canada	Portugal
European Commission	Republic of Korea
France	Singapore
Germany	Spain
India	United Kingdom
Italy	United States of America
