

European Commission

# BIODIVERSITY

is the variety of *all living forms* on Earth. We are part of it and it is essential for *our society* and *quality of life*.

nature for wellbeing

pollinators for food

urban green areas to improve climate, health and wellbeing

plants as medicine

algae to food

The EU consumption affects biodiversity even far from Europe

## HOW WE BENEFIT from biodiversity

## HOW WE HARM biodiversity

Let's make our way of life sustainable to bring back nature into our lives

## THE EU BIODIVERSITY STRATEGY FOR 2030

PROTECT nature

EU as a GLOBAL LEADER for the good of the World's biodiversity

Agriculture and fisheries

RESTORE ecosystems

transformative CHANGE

Education

Health and climate

Research and innovation

Transport and energy

EU and global policies

Trade and development

## THE KNOWLEDGE CENTRE FOR BIODIVERSITY

CONNECTS

MAKES SENSE, FILTERS AND SYNTHESISES data and information from different sources

COMMUNICATES to

other decision-makers

policymakers
